5 Business Insights

1. **The attrition rate of 19.73% is relatively high and suggests that nearly one out of every five employees has left the organization.** At this level, hiring and training costs are likely to increase significantly if the trend continues.
2. **The Sales department has the largest workforce (335 employees), making it the organization's biggest talent pool.** Even a small increase in turnover within this department could have a larger operational impact than in smaller teams.
3. **The gender distribution is well balanced, with approximately 495 male and 480 female employees.** This indicates that recruitment has maintained near parity, reducing the risk of workforce imbalance.
4. **Departments such as IT and Marketing have noticeably fewer employees than Sales and Finance.** These leaner teams may face workload pressure if attrition occurs, making retention in these areas especially important.
5. **The dashboard shows a very high total salary expenditure in larger departments, indicating that workforce size is the primary driver of payroll costs.** Any future hiring plans should consider optimizing staffing levels before expanding headcount.

3 Recommendations

6. **Prioritize retention efforts in the Sales department. Since it has the highest employee count, reducing turnover there will have the greatest impact on organizational stability and recruitment costs.**
7. **Conduct exit interviews and periodic employee satisfaction surveys to understand the reasons behind the 19.73% attrition rate. Addressing recurring issues can help reduce avoidable resignations.**
8. **Strengthen training and development programs so employees can enhance their skills and remain motivated to grow within the organization instead of seeking opportunities elsewhere.**
